

**Edward F Kaczowski**

Hello. My name is Ed Kaczowski and I have been an Audi enthusiast since I purchase my 2000 Audi S4. It's a daily driver and I still enjoy every time I am behind the wheel. The car currently has 165k miles on the odometer but looks and drives like new. Keeping it that way is a passion. I have also been a volunteer at the Pittsburgh Vintage Grand Prix since the 1990's so when Audi was the Marque of the Year in 2000 it was a great opportunity to bring my car out and share it with the display. In 2010 there was not much going on locally with the Audi Club which at that time was a part of the Ohio Chapter. Myself with several other like-minded enthusiasts petitioned ACNA National to recognize Western PA as a new chapter, which they did. During that reorganization in 2011, elections were held and the Board of Director positions were voted on and filled. It has been my honor to have served since that time as acting President. I continue to be the liaison between the PVGP and our Audi Chapter. I am currently retired having worked in the steel and plastics businesses for 36 years. My education is in engineering. I started out as a Project Engineer then moved on to Project Management then into Product Management. That education and experience has allowed me to interact with people and manage tasks, which I truly enjoy. I would like to have the opportunity to continue to apply these skills and experience to help grow our chapter membership and broaden participation. I respectfully ask for your vote for Board of Director member. Thank you.
